SUMMARY

Full Stack Web Developer with a background in Mathematics. I love the collaborative nature of web development where the philosophy is two heads are better than one, although one works as well! I enjoy creating user-friendly products that have organized, intuitive functionality ensuring a seamless user experience.

SKILLS

LANGUAGES: JavaScript, HTML, CSS, SQL, Ruby

FRAMEWORKS & LIBRARIES: ReactJS, NextJS, Bootstraps, NodeJS, Express, EJS, Ajax, jQuery, Material-UI, Rails

SYSTEMS & DATABASES: PostgreSQL, Git

TESTING: Jest, Storybook, Cypress, RSpec

PROJECTS

- Waxwing Oct. 2022
- React-based app that allows users to view and share recipes for drinks. Users can also create their own recipes.
 - Tech Stack: React, Express, PSQL, Knex.js, Axios, Bootstrap, Styled Components, Material UI
- Wiki-Maps Aug. 2022
- Web application that allows users to collaboratively create maps that list multiple locations. For example: "Best Places to Eat Around Town" or "Locations of Movie Scenes".
 - Tech Stack: Express, Node, PostgreSQL, EJS, Ajax, jQuery
- Jungle Sept. 2022
- An app built with Ruby on Rails that allows visitors to view, purchase, and review products. Email receipts are sent upon a successful order that uses the Stripe API for secure transactions.
 - Tech Stack: Ruby, Rails, Stripe API, PostgreSQL, Bootstrap CSS
- Scheduler Sept. 2022
- Single-page application that allows students to book and cancel interviews with mentors in real time.
 - Tech Stack:** React, Axios, Classnames, Normalize, Storybook, Cypress
- TinnyApp Aug. 2022
- RESTful URL shortening web application
 - Tech Stack:** Node, Express, EJS
